

On-Call Rotation Policy

Engineering · classification: Internal

On-Call Rotation Policy (Tech)

===== On-call rotates weekly with a primary and a secondary per service group. Pages are acknowledged within five minutes; the secondary escalates automatically. Handover includes open incidents, risky changes and watch items. Compensation follows the on-call allowance schedule, and post-incident night work is recovered per the time-off policy. Repeated after-hours burn triggers a reliability review, not heroics.
