

Incident Response Plan

Engineering · classification: Internal

Incident Response Plan (Tech)

===== Severity 1 means customer-impacting outage or suspected data breach: page the on-call, open a war room and notify the security duty officer within 15 minutes. Contain first, eradicate second, then recover and verify. Every Sev1 gets a blameless post-mortem within 5 working days with tracked action items. Regulatory notification decisions are made by the security council, not by individual engineers.
