

Emergency Evacuation Plan

Operations · classification: Public

Emergency Evacuation Plan (Operations)

===== On the alarm, stop work, leave belongings and exit via the nearest marked route; assembly points are the parking forecourt and the plaza across the main road. Floor marshals sweep their zones and report to the assembly coordinator. Lifts are out of use during alarms. Drills run twice a year; participation is mandatory and recorded. First-aid kits and AEDs are located at each fire point.
